

District says 2018 \$25,000,000 voter approved levy IS NOT ENOUGH!

- Student math scores continue to fall yet teacher performance not considered.
- Hiring Board Admin Clerk and Internal Auditor suggestion met disrespectful rebuke from Director Sebren. Disgraceful treatment of Board member when new board member presents slide/ideas, yet Board uncertain how to manage pay vouchers and pay warrants.
- Staff members travel to Washington D.C. to lobby elected officials. One year travel costs exceed \$500,000 for fewer than 35 staff members. Another four-day trip to Virginia costs \$2,365 for airfare, hotel, per diem for one person.
- District knows about lead contamination for years, yet not included in priority projects. Pool repairs considered "priority project", Superintendent says it is most visible project to voters.
- Cost overruns on science lab remodel exceeds \$553,000. What will pool repair overruns cost us?
- Expect explanations and more requests by District in 2022 for more money to complete projects they will not complete with current levy funding. Chris Henry news story confirms current capital levy funding won't be enough to complete projects promised by District. District promises mean nothing.
- Contingency funds set aside for safety, technology, security projects, nothing set aside for capital improvement projects. Board must be confident capital improvement projects will stay within budgets.
- Taxpayers don't know levy spread over four year; not told pool repair estimates insufficient; not told at least a full year of capital levy revenue needed for pool. Superintendent Winter tells Board pool project highest priority so must please voters, yet no mention that \$4.5 million budget will not be sufficient.
