

# *Where \$ome of Your Money Goes*

## **Crew Competition**

*(Competitive Rowing Team - Cost: \$8,000 per event)*

South Kitsap's Rowing Team has been in existence since 2017. In 2019 South Kitsap became the first ever Rowing Team to have one of their members earn a scholarship to Gonzaga University. It is assumed that the goal of this program was to earn scholarships for participants, nevertheless it is an outstanding achievement. The cost of this program is approximately \$8,000 each time they 'wet their oars'. As of 2018 the program has cost the taxpayers \$500,000. How many other scholarships could have been funded for the continuing costs of this program?
