

A Stain on the South Kitsap School Board

South Kitsap School Director Berg maintains what he claims to be an "Educational Website" for community stakeholders in South Kitsap. He has posted approximately 35 separate sections with multiple pages for each section. He has essentially created dossiers on at least 28 individuals. Twenty-four of these individuals appearing to support his views he casts in a positive light. Four 'other' individuals not supporting him are cast in a negative light. He has been particularly vicious and offensive regarding a fellow school board director.

A community member now recently deceased formed a committee and wrote a voters guide statement against the last SKSD levy. Mr. Berg posted insulting and defaming words about this deceased member of our community, apparently because that individual chose to oppose the last school levy. Why is Mr. Berg compelled to insult a deceased person who voiced an opinion? Mr. Berg's lack of decency, empathy, and decorum clearly demonstrates his lack of respect for the deceased member and his surviving family members. Is this the type of information for a school director to post about another human being?

Mr. Berg's "dossiers and other writings" are as disgraceful, disrespectful, and callous as those he has posted about the community member we have lost. Ask yourself, are Mr. Berg's actions, qualities and behaviors compatible with holding any elected office? **NO!** It's long past time to censure, then recall Director Berg.
